Profile

Results-driven Project Manager with over three years of experience successfully managing and leading the development of IT solutions. Proficient in analyzing client requirements and providing expert advice to management and clients on options and recommendations for the definition, development, and implementation of IT solutions. Seeking to challenge myself in a new role that leverages my skills and expertise in effectively leading and managing teams to deliver outstanding project results.

Strengths

Leadership # Communication # Problem-solving # Technical expertise # Strategic planning
Organization # Analytical thinking # Software development # Database Management

Work Experience

11/2021 – present
Ottawa, Canada

Project Manager

Canada Border Services Agency - Analytics Solutions Division

- Coordinated and supervised technical teams, ensuring seamless project execution.
- Demonstrated exceptional leadership skills by assigning tasks and establishing clear timelines for a high-performing agile team.
- Actively collaborated with senior management to ensure smooth flow of communication and coordinated efforts.
- Successfully maintained a cloud database solution, assisted migrating a BI reporting tool and showcasing the project as a tangible proof of concept for transitioning on-premise solutions to cutting-edge technology stacks in the cloud.
- Conducted thorough technical analysis on data warehouse solutions, proficiently identifying and resolving reporting issues.

06/2015 – 11/2021
Ottawa, Canada

Software developer

Versaterm Public Safety - Records Management System Team

- Developed, tested, maintained, and supported complex IT solutions for police agencies throughout North America.
- Acted as the technical lead in implementing the Government of Saskatchewan's province-wide Record Management System, successfully delivering a fully realized proof of concept to expand our customer base and introduce new technology stacks to our clients' IT solutions.
- Led the technical aspects of multiple agency-wide upgrade projects, including Ottawa Police Service, Service de Police de la Ville de Gatineau, Niagara Regional Police, Halifax Regional Police, City of Fredericton, and Medicine Hat Police Service.
- Collaborated closely with client community to identify and address real-world problems, providing effective solutions.
- Worked collaboratively with teammates to create and maintain comprehensive technical IT documentation.

05/2014 – 08/2014
Ottawa, Canada

Co-Op Student

Canada Border Services Agency - Corporate Systems Division

- Collaborated with team members to develop and execute comprehensive test plans.

Work Experience

- Carried out and automated a regression test suite for the CBSA wiki, optimizing testing efficiency.
- Conducted thorough systems testing on the Incident Management Reporting System, assuring its reliability and functionality.
- Utilized Jira bug reporting tool to accurately document and monitor software bugs throughout the development lifecycle.
- Exemplified exceptional multitasking and organizational abilities, facilitating seamless coordination and efficient task management.

Education

2011 – 2015
Gatineau, Canada

Computer Science | Diploma of College Studies (DEC) Cegep Heritage

- Developed and implemented a software application as a part of a team project.
- Completed coursework in advanced algorithms and data structures, achieving consistently high grades and demonstrating strong problem-solving and analytical skills.

Certificates

01/2023

Certified Safe Scrum Master Scaled agile

I am a Certified Safe Scrum Master, authorized by Scaled Agile. This certification attests to my expertise in implementing Scrum practices at scale, ensuring the safe and efficient delivery of projects within an agile framework.
